To Our Friends and Customers:

In this booklet you will find listed for your selection the very worthwhile bulbs, plants, shrubs and trees which we especially recommend for planting this fall.

On such items as Tulips, Hyacinths, Narcissi, Crocus, Bulbous Iris, Chionodoxas, Snowdrops, Scillas, Muscari, and Fritillaria, that must be planted this fall, we have given more information in detail, but trees, shrubs, perennial plants, etc., have merely been priced as more complete information is contained in our Garden Book No. 36, copy of which you already have. If you have mislaid it please advise and we will gladly send another.

Our New Garden Book No. 37

Will Be Ready for You in December or Early January

If you have even the smallest plot of ground to improve you will be interested in this valuable new book.

It will contain more than 100 pages concisely written, giving the correct solution to your garden problems—beautifully illustrated with half-tone pictures, many in full natural colors made from actual photographs of new and worth while vegetables, flowers, shrubs, roses, and trees.

Here are some of the outstanding features:

For the Gardener—Standard and novelty vegetable money makers.

For the Rose Enthusiast—New patent roses in natural colors.

For the Orchardist—New varieties of apples, peaches, and small fruits.

For the Farmer—Novel types of forage, seeds for reclaiming alkali lands, swamp lands, as well as arid areas.

For the Home Owner—It will tell how, where and what to plant in the very worth while garden vegetables, flowers, shrubs and trees. In a word, it will be brim full of just that important information so vital to the success of the home grounds. You will be delighted with this book.

Garden Book No. 37 will be sent free without request to all who have given us orders within the last two years. To all others who are interested in receiving this book will you please send us your name and address? You may use the self-addressed envelope and order sheet in this book for that purpose should you not order anything this fall. A name of an interested friend or neighbor will be appreciated.

In the event you have no use for this booklet will you please hand it to some interested friend or neighbor? Thank you.

Sincerely yours for a better garden than ever,

BULBS EASY TO GROW

Success Is Sure With P.-W's Selected Stock

For Outside Planting

The Time to Plant: First of all the fact should be emphasized that the Autumn Mouths and not Spring is the proper time to plant Hyacinths, Tulips, Narcissus, Daffodils, Crocus and other spring flowering bulbs and hardy perennial plants. Most of the varieties described in this list are ready for delivery the latter part of September or early October and should be planted as soon as convenient after that time, but surely before the ground freezes. "Lily of the Valley" and some of the Hardy Lilies are not ready until November or December; should there be danger of the ground freezing before that time, cover the space to be planted with leaves or straw and the bulbs can then be planted at your convenience after arrival. The Time to Plant: First of all the fact should be

Kind of Soil: Any good, moderately rich, well drained soil is suitable for most bulbs; avoid heavy and boggy soils as poor drainage is fatal. In a stiff clay formation, supply a small quantity of sand or coal ashes at the base of each bulb and enrich soil with bone meal, "Plant Life" or very well rotted manure, but do not use fresh stable manure under any conditions.

Proper Depth: Depends upon the size of the bulbs. A good rule is to place each bulb from one and one-half times to twice its own thickness below the surface of the ground. In districts of extremely cold temperature it is advisable to mulch the beds with leaves or straw during the severe weather, but care should be taken to remove the covering upon the approach of spring. In Salt Lake and equally mild climates no such protection is necessary.

Distance Apart varies with the variety from 2 to 3 inches for Crocus to 12 to 18 inches for Lilies. The proper space is indicated under the respective headings in this list.

ings in this list,

For Indoor Planting

When the bulbs arrive in the fall place them directly into the pots or containers in which you wish them to bloom, using for this purpose a light loamy rich soil; setting them from two to four inches apart and just deep enough to cover the top of the bulb. Do not make the mistake of filling the pot or con-tainer too full so as not to allow margin for wateraway in some cool, dark room, for at least six weeks before bringing any of them to the living room. The only attention necessary when in the dark is to see that they are kept moist. You can regulate the time of blooming and secure a continuous succession by bringing them to the living room at regular intervals during the winter. Be sure to keep them well watered after bringing them to the light and heat.

Instead of putting the planted bulbs in a dark, cool room in the inside many prefer to dig a trench in some corner of the garden, covering pots and all about six inches deep, being careful to provide a thin layer of ashes at bottom to prevent earth worms. By raking a few leaves over the top to prevent the ground from freezing, the pots can be lifted anytime desired during the winter and brought into bloom in the living room in a very short time.

Water Culture: Large size Hyacinths, Chinese Lilies, Paper White and Soleil d'Or Narcissus can be easily grown in water in glasses and bowls. By successive planting continuous bloom from November till March can be had. It's mighty interesting to watch their development.

CAUTION--Don't plant bulbs in new pots without first soaking the pots a few days in water.

TAKE THE GLOOM OUT OF WINTER

Indoors-Right in Your Own Home-Grow Bulbs for Winter Cheer

Here is how you can enjoy a real colorful window or conservatory flower garden during this winter with no trouble and a slight expense for materials.

Even the "Apartment House Dweller" Can Do This

What to Do

USE PREPARED BULB FIBRE

And no need of ugly pots either; use a bowl of your favorite color blending with the furnishing scheme of the room. This will lend an additional charm to your plant—you will enjoy it so much

Our Bulb Fibre is a complete substitute for soil scientifically prepared for use in receptacles without drainage. It is clean and odorless; no saucers necessary; no fear of staining the woodwork or table coverings. And bulbs really grow better in it than in soil for it absorbs and holds an even moisture and on account of its fluffiness allows the roots to penetrate freely. This Fibre is cleverly impregnated with plant-food in such a manner that it becomes available gradually but continually as required by the plants to assure a steady, healthy, and vigorous growth. growth.

Prices Prepared Bulb Fibre

Lb., 20c; 5 lbs., 90c, postpaid. Not prepaid, 10 lbs., \$1.25; 100 lbs., \$10.00.

Bulb Bowls

We carry a large assortment of Bulb Bowls, embracing most every desirable size, type, design and color. Prices range from 35c to \$1.00 each, postpaid.

How to Do It

DIRECTIONS FOR USING BULB FIBRE

Wet the Fibre thoroughly until it has absorbed all the water it can hold. This is best done in a pail or pan. Then squeeze out nearly all the water and it will be just right for planting. Fill the bowl three-fourths full or to within a few inches of the top, according to the size of the bulb. Press down gently (never pack it down), set bulbs at the proper distances, and fill up with Fibre. Press it gently around the bulbs but don't pack it down. Keep the Fibre damp by spraying it lightly every day but never allow it to become too wet. All bulbs, except Freesias and Callas, should be kept in a dark place to develop roots before sprouting. Hyacinths, Daffodils, and Tulips require from four to six weeks; Paper-White and Soleil d'Or Narcissi and Chinese Lilies from two to three weeks. By bringing in a few bowls at intervals and making additional plantings one may enjoy blooming plants all through the winter months.

P.-W.'s MAMMOTH TULIPS THAT FLOWER IN MAY

English Garden Tulips This class is properly a division of the Mammoth Flowering Tulips. The shape of the flowers is distinctive, being long and pointed, and the petals are frequently reflexed. While the flowers are large and gracefully formed, in general this class does not grow quite as tall as the "Giant Flowering" group, yet they bloom the same time and bed well together. Lending an indescribable charm and grace to the Spring Garden, they have been aptly designated the "Patricians" of the tulip family. (Same culture as "Giants." See next page.)

FLOWERING TULIPS

EVERY TYPE, STYLE, HUE AND COLOR

Colorful Giant Flowering Tulips these Tulips are marveBorder, massed in clumps along the edge of shrubbery, or as cutflowers for vases.

Listed under this class are all the very desirable varieties of the
so-called "Ideal-Darwin," "Darwin," "Breeder," and "New Hybrids."
There is really no sense to the past practice of separating these tulips
into different groups as the bloom periods, height and habits of growth
of all are within the same range and they are all really derived from
the same source. So under whatever name you have been buying in the
past you will find your favorite in this list.

Plant 6 inches apart, 4 to 5 inches deep in heavy and 6 inches in
light soils. For convenience in figuring allow 4 bulbs for each square
foot to be planted.

The number immediately following the name is the average height
in inches.

THE FRAGRANT HYACINTH

THE "BIG TEN" RAINBOW COLLECTION

Garden Culture. Bulbs may be planted from the end of September until very severe weather sets in. The beds should be raised a few inches above the surrounding ground, to prevent lodgments of water, which causes bulbs to rot. Bulbs should be set 6 to 8 inches apart and 6 to 8 inches deep. If the soil is dry at planting time it should be watered and kept moist while the weather permits.

Hyacinths in Pots. Get rich, light soil or Bulb Fiber. If soil, provide drainage. Break off any offsets which appear at the base of the bulbs, and, in potting, place each bulb so that its top shall be half an inch below the surface of the soil, and about an inch below the

rim of the pot.

(Named Sorts)

(Named Sorts)

These bulbs are splendid forcing. Pot culture and outdoor beds. They are smaller bulbs than the "exhibition" size listed above but we offer precisely the same varieties, the only difference being the flower spikes may be slightly smaller. They may be used for formal garden planting with every assurance that when they are in bloom the design will not be ruined by having flowers of unequal height, differences in blooming time, weak stems or color clashes sometimes experienced in bedding mixtures.

P.-W.'S NARCISSI "SPRING GLORY" COLLECTION

Collections of Four Large Daffodils

These collections contain the following large-flowering varieties described on these two pages:

Emporer, Von Sion, Sir Watkin and Poetaz Elvira. All selected bulbs. Three bulbs each No. 12A. (12 bulbs, value \$1.00) Twelve bulbs each (48 bulbs, value \$3.40) No. 12C. ... 2.60 25 bulbs each (100 bulbs, value \$6.00)

Mixture of Dwarf Types. For Rockeries and naturalizing. 14c each; \$1.40 doz; \$10.00 per

NOTE. In describing Narcissus reference is made to the "perianth" and the "trumpet." The latter is the long center, funnel-shaped tube, and the perianth is the outer row of petals or wings.

The top of the bulbs should be planted four inches below the surface and 6 to 12 inches apart.

Double Daffodils

DOUBLE VON SION. Too well known to need description; grand old golden double yellow Daffodil. Selected Bulbs, 9c each; 90c doz.; \$6.00 per 100.

Mother Bulbs, 11e each; \$1.15 doz.; \$8.00 per 100.

Sulphur Phoenix (Incomparabilis). Large, double creamy-white with deeper center, very chaste and beautiful.

Selected Bulbs, 9c each; 90c doz.; \$6.00 per 100. Mother Bulbs, 11c each; \$1.15 doz.; \$8.00 per 100.

Trumpet Daffodils, Mixed Many of our requested us to furnish them with a mixture of Narcissi which could be used for mass planting in the garden, the woodland, or the meadow. Our mixture contains all hardy varieties suited for this purpose. The plants will multiply from year to year and give the natural effect so much desired. 12 for 60c; \$4.00 per 100; \$37.50 per 1000.

P.-W.'S LOVELY DAFFODILS SELECTED BULBS FROM AMERICA'S SPECIALISTS

Reliable Narcissus (Northwestern Grown harder bulbous plants with more merit than the Narcissus or Daffodil. They grow well in almost any climate or condition, sun or shade, moist or dry, although they have a preference for good, deep soil, and a partly shaded position.

They are equally desirable for pot culture for winter flowering: three or four bulbs can be put in a

five or six-inch pot and the whole winter and early spring months can be made bright with their exquisite gold and silver blooms. Once planted, they need no further attention, the clump multiplying and giving better results each year, and from an original planting of a few hundred bulbs, in two or three planting of a few hundred bulbs, in years can be cut thousands of flowers.

Probably no perennial is more universally acclaimed and loved, and we know of none that justifies such popularity more than the Peony. Peonies are best planted from the latter part of September until the ground freezes in the Mountain States. An important point to ob-

freezes in the Mountain States. An important point to observe in the planting of Peonies is not to plant too deep. The roots should be placed so that the crowns are covered with two or three inches of soil. Too deep planting is a frequent cause of shy flowering. Proper distance apart is from 3½ to 4 feet.

NOTE: Figures following varieties indicate the rating given them by the American Peony Society. The highest rating a peony can receive is 10. There is no variety yet with such a rating; 9 is excellent, 8 is very good, 7 is good.

FERN LEAVED PEONY

Tenuifolium. A very interesting, early flowering, red variety that is seldom found in catalogs. It is so distinct from all other varieties that it deserves a place in every collection. Its delicate fringed fern-like foliage always attracts attention. It blooms very early, before the popular Chinese varieties. Our stock is limited. \$1.50 each.

P.-W.'s FLOWERING BULBS FOR INDOOR PLANTING

Flowers in the house from Christmas until Easter. Use any of the first size named Hyacinths or the Single Early and Double Early Tulips. Also the Narcissi, which seem almost to grow themselves.

Giant White Narcissus

Flowers pure snow-white, desirable for their beauty and fragrance, forces admirably. Will bloom as early as December and flowers freely in dense clusters. Splendid for growing in water with pebbles and moss.

Large Bulbs 5c each; 50c per doz.; \$3.50 per 100

Calla Lilies (Pot Culture)

Yellow Calla. Ready in October. Rich golden yellow almost identical with the white except for color. Mammoth bulbs, 25c each; \$2.50 per doz.

Godfrey Everblooming White Calla. An improvement over the ordinary White Calla. Strong flowering roots, 25c each; \$2.50 per doz.

Chinese Sacred Lily

Usually grown in bowls of water. Place an inch or two of sand and gravel in the bowl and place the bulbs on this. Put enough gravel or shells around the bulbs to keep from falling over. Fill bowl with water and set in dark closet for a few days until the roots start freely, then bring to the light in an ordinary living room. Starting at intervals will give a succession of bloom during the winter. 10c each. Large bulbs. \$1.00 per doz.; \$7.50 per 100. Extra large bulbs 15c each; \$1.50 per doz.; \$10.00 per 100.

Freesias

Purity. Lasting fragrant white flowers borne in clusters. When potted, do not place in a dark room like most other bulbs, but put directly in the light. Will bloom by Christmas and flower in succession until June. Large bulbs. 40c per doz.; \$3.00 per 100.

Rainbow Mixed Colors. Large, fragrant mixture of beautiful shades. 60c per doz.; \$4.00 per 100.

Soleil d'Or or Golden Sun

Large clusters of rich yellow flowers with a deep orange-red cup. 10c each; \$1.00 per doz.; \$7.00 per 100.

Oxalis

White, lavender, and yellow. 50c per doz.; \$3.50 per 100.

P.-W.'s LAWN SEED (For Fall Sowing)

Lawns Made in the Fall have many advantages over those made during the Spring months, as the conditions are ideal for quick germination of seed, and the plants will make deeper roots and more healthy growth. (See Vigoro, the ideal fertilizer.)

Kentucky Blue Grass. The main stay for lawn making. Our stock is extra fancy. Lb., 50e; 3 lbs., \$1.40, postpaid. Not postpaid, lb., 45e; 10 lbs., \$4.00.

P-W's Creeping Bent. Especially recommended for Lawn and Golf Courses, for the reason that it makes an exceptionally fine turf that smothers out dandelions and other weeds. Sow in Fall or Spring 3 to 4 lbs. to 1,000 square feet. 1 lb., \$1.50; 3 lbs., \$4.25, postpaid.

3 to 4 lbs. to 1,000 square feet. 1 lb., \$1.50; 3 lbs., \$4.25, postpaid.

White Clover. First class recleaned seed. Specially selected for lawn use. Lb., 60c, postpaid. Not prepaid, lb., 55c; 10 lbs., \$5.00.

P-W's Velvet Green Lawn Mixture. Produces a beautiful permanent lawn in four to six weeks. Sow at rate of one pound to 200 square feet. 1 lb., 55c;

3 lbs., \$1.50, postpaid. Not prepaid, lb., 50c; 10 lbs.,

P-W's Shady Nook Lawn Mixture. Prepared especially for shady places where it is difficult to get a turf established. Lb., 60c, postpaid. Not prepaid, lb., 55c; 10 lbs., \$5.00.

P.-W.'s Special Bent Mixture

This splendid mixture is made up of grasses that will make a closely woven tough turf, choking out weeds and producing a beautiful green sward. We especially recommend this to situations where trouble is had with Dandelions and other objectionable weeds.

Lib., 75c; 10 lbs., \$7.00 prepaid. Not prepaid, lb., 70c; 10 lbs., \$6.50.

Western Alkali Grass

Produces in alkaline soils where all others fail. Seeding can be done any time from September 1 until spring; broadcast right on the snow and not after the snow is gone and land dries off and starts to crack. Use "Cyclone" seeder, sowing two pounds per acre for meadow nasture

crack. Use "Cyclone" seeder, sowing two pounds per acre for meadow pasture.

It commences to bloom when the head is about half way out of the boot. If the season is very dry, it may not completely head out and it is better to cut it before it bleaches. Cut it under these circumstances when it commences to bleach. Seed crop in doubt—write for prices.

Dry Land Rye

A drouth-resisting strain of Fall Rye strictly dry land grown; produces forage and grain where others fail. Sow 20 to 30 lbs. per acre. 10 lbs., \$1.00, postpaid. Not prepaid, 100 lbs., \$2.50. Write for quantity prices.

FRUIT TREES

At our Nurseries we have a particularly fine lot of strong, healthy trees. This stock has been selected and critically grown to meet the requirements of orchardists planting for eastern or local markets. We believe, also, those of our patrons who are planting a small orchard for home use will find sufficient variety to amply fill every want in the fruit line. Detailed planting and cultural directions, free with each order. Ask for them. Our trees are very carefully graded to size and height but in determination of grade the Caliper usually governs.

Ordinary seasons we are able to deliver fruit and ornamental trees the latter part of October. In secions where ground freezes up early, we advise spring delivery. Prices quoted are f.o.b. Salt Lake City. It is not necessary to buy 10 or 40 of a single variety to secure the respective quantity rates; 10 or more assorted fruit trees may be priced at the ten rates applying on the particular varieties selected, and 40 or more may be priced at the 40 or more price schedules. On all orders below ten, the each prices
